PROFESSIONAL SUMMARY

Automation Test Engineer with **3.5+ years of experience** in **Python-based test automation and quality assurance** for web applications. Strong hands-on expertise in **Playwright and Selenium**, with experience in **UI, API, and database testing**. Proven ability to build and maintain **automation frameworks**, integrate tests into **CI/CD pipelines**, and support **Agile teams** to deliver reliable, high-quality software. Adept at combining **automation-first testing** with focused manual validation to improve coverage, efficiency, and release confidence.

PROFESSIONAL EXPERIENCE

SOFTWARE TEST ENGINEER

Wipro Limited

06/2022 – 05/2025

Pune, India

- Developed and executed **Python automation scripts using Playwright and Selenium**, increasing **test coverage by ~45%** across critical application areas.
- Designed reusable automation components and maintained test suites, improving **execution stability and maintainability**.
- Automated **regression and smoke test suites**, reducing **manual testing effort by ~40%** per release.
- Integrated automated tests into **Jenkins CI/CD pipelines**, enabling **early defect detection and faster feedback**.
- Performed **API testing** using Postman and **SQL-based database validation** to ensure backend correctness.
- Collaborated within **Agile/Scrum teams** to analyze failures, validate fixes, and improve overall test reliability.

ETL TEST ENGINEER

Pyramid IT Consulting Pvt. Ltd.

12/2021 – 06/2022

Pune, India

- Executed backend and application testing for reporting systems involving complex business rules.
- Developed **SQL-based validation scripts** and supported **SIT, UAT, and regression cycles**.
- Identified automation-suitable scenarios and supported transition from manual to automated testing.

CERTIFIED MAINTENANCE TECHNICIAN

Auto Hanger Private limited

09/2018 – 07/2020

Mumbai, India

- Performed inspections and testing of mechanical and electrical systems, ensuring **process compliance, safety, and quality standards**.
- Applied structured troubleshooting and root-cause analysis techniques, reinforcing a **quality-focused engineering mindset**.

FREELANCE AUTOMATION SPECIALIST

AI Automation & Web Solutions Engineer (Freelance) May 2025 – Present | Remote

05/2025

Remote

- Designed and delivered **AI-driven workflow automations** using **n8n and Make.com**, integrating **Gmail, Google Sheets, APIs, CRMs, and ChatGPT** to automate repetitive business operations.
- Built **customer feedback automation pipelines** to **analyze, categorize, and auto-respond to reviews and emails**, reducing manual handling effort by **40–70%**.
- Developed **AI-assisted scripts** using Python to support **data processing, test automation utilities, and workflow orchestration**.

- Implemented **small-scale web development solutions** (landing pages, internal tools, automation dashboards) to support automation use cases and client operations.
- Created **proof-of-concept demos and production-ready workflows**, including routing logic, error handling, and logging for reliability.
- Collaborated directly with clients to understand business problems and translate them into **scalable automation and lightweight web solutions**.

Tools & Technologies: n8n, Make.com  , ChatGPT / AI APIs, Python, REST APIs, Google Sheets, Gmail, Git, Webhooks, HTML/CSS (basic), Automation Scripting

EDUCATION

B.E.

S.G.B.A.U. University

SKILLS

CORE SKILLS

Automation & Testing

- Automation Testing (Playwright, Selenium)
- Python Automation Frameworks
- Automated UI Testing
- API Testing (Postman, REST validation)
- Database Testing (SQL validation)
- Regression, Smoke & Sanity Automation
- n8n
- Make.com  (Integromat)
- AI-assisted scripting (Python + ChatGPT)
- Workflow orchestration & integrations

Performance & CI/CD

- Performance Testing (JMeter – functional exposure)
- Jenkins (CI/CD integration)
- Git, GitHub
- Azure DevOps / Jira

Practices

- Agile / Scrum
- SDLC & STLC
- Automation-first Testing Strategy
- Manual Validation (as required)

CERTIFICATES

Artificial Intelligence

Fundamentals

AI Overview: Introduction to AI, covering NLP, Computer Vision, Machine Learning, Deep Learning, and running models with IBM Watson Studio. Includes AI Ethics and insights into the future job landscape in AI.
